

Figure 1: Management Unit 7A (North Foreland)

 Blue: Recycling Extraction Point
Red: Recycling Deposition Area

This section is primarily made up of two pocket beaches, Joss Bay and Kingsgate Bay, both of which are extremely popular beaches for leisure. The frontage is characterised by a sandy beach face and backed by steep chalk cliffs.

No recycling works have been undertaken within this management unit due to the management policy being primarily 'No Active Intervention', allowing natural erosive processes to continue on the chalk cliffs.

Survey Regime

Survey type	Frequency	Profile spacing/survey extent
Topographic baseline	Never	-
Topographic interim profile	No	-
Bathymetry	5 years	50m profiles to 1km offshore
Ortho-photography	5 years	MLW
Aerial photography	Ceased in 2008	MLW
Lidar	Rolling Programme	MLW
Habitat Mapping	5 Years	As Required

Full details of data availability and extents can be found on the Channel Coast Observatory Website (www.channelcoast.org)

Summary of Beach Operations

Date	Operation	Quantity (m ³)	Location/Notes
No beach material has been recycled since 2003			

Full details of beach operations can be obtained from Canterbury City Council (strategic.monitoring@canterbury.gov.uk)
